ADINSTRUMENTS
making science easier

What participants say about ADInstruments training courses:

“ Having a small group was very helpful. I felt I was able to ask questions and for help...
...several insights into the system were given that will make our analysis easier...
...I like that the instructor tailored the course to each individual where possible - it was extremely helpful for my personal data analysis ”

Be Trained in Your Lab or Classroom

Can't make any of our scheduled training courses? Need training in a specific application or technique? Like to be trained using your own equipment, alongside your colleagues?

Ask us about providing customised training at your institution. You choose the date and provide the location, and we will work with you to develop a training agenda that addresses your experience level and specific requirements. Contact us at training.eu@adinstruments.com for more information.

Enjoy Local Support for European PowerLab Users

- **Local support scientists** — In addition to our network of 17 locally-based Application Scientists and Education Specialists, ADInstruments has a dedicated European support team who are ready to answer your questions over the phone, via email and in-person.
- **WebEx training & support** — Enhance your PowerLab productivity without leaving your desk with our online training sessions. We regularly hold online training sessions using WebEx internet and phone conferencing technology.

If you need individual support, we can use WebEx to see exactly what's happening in your LabChart or LabAuthor windows, identify the problem, and talk you through the solution.

Access Online Resources

Visit our website for resources including:

- **Software Forum** — Discuss your research and teaching with PowerLab users worldwide
- **Document Archives** — Technique Notes, Software Tips and Hardware Manuals
- **Citations Database** — Search through over 9000 published papers citing our products
