

# KAHA telemetry seminar

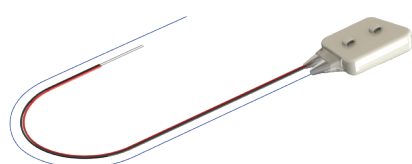

We invite you to join us at the Florey Institute for our KAHA telemetry seminar.

Mark de Reus

Our global Head of Support, Mark de Reus, will be showcasing our KAHA telemetry system. Join him as he discusses how you can use our LabChart software for data acquisition and analysis. In addition, there will be presentations from current users sharing their telemetry experiences, including surgical techniques and implantation in both rats and mice.

This event is designed for existing and new telemetry researchers and there is a chance to network with other telemetry researchers in Australia.

Rat Optogenetics and Biopotential telemeter

Mouse Biopotential telemeter

ECG recording from three mice in LabChart Lightning

**Venue:** Florey Institute, Melbourne (room details to follow)

**Date:** 26th of October, Friday

**Time:** 9am - 2pm, lunch provided

## Registration
